Patient:	BANG BANG	Species:	Canine	Patient ID:	119601
Client:	CARLA BARROS	Gender:	Female	Sample No.:	01
Doctor:		Age:	1Y	Time of analysis:	2026/08/28 12:52

Lab item	Current result
CPV Ag	**Positive**

Operator:

Report Explan.

CPV Ag	A positive result indicates the canine parvovirus antigen is present in the sample. Even if the result is negative, the possibility of CPV-infection cannot be ruled out. * As with all other diagnostic tests, a single test result should not be used as the sole basis for clinical diagnosis but rather should be comprehensively evaluated by a veterinarian in combination with clinical symptoms and other laboratory test results.

Note: Due to the complexity and individuality of disease diagnosis, the report interpretation is only for your reference. Please consult your doctors for clinical diagnosis results.

The results only applies to this test sample. Test Instrument:Mindray vetXpert I3 Time of Printing:2026-08-28 12:57:45
